DETAILED ACTION

Allowable Subject Matter

1. Claims 1-5 are allowable as written over the prior art and do not suffer from any deficiencies under 35 U.S.C. § 101 or § 112. The following is an examiner's statement of reasons for allowance: Regarding independent claims 1 and 5, Inoue et al., JP 04-280088 (1992) ("Inoue") and Konig et al., US 5,389,585 (1995) ("Konig") appear to be the most pertinent references of record. Inoue teaches a method of making a honeycomb structure by kneading and subsequently extruding a mull comprising 5.5 μm diameter SiC powder and water, yielding a honeycomb of 0.5 mm rib thickness (i.e.: the SiC particulate diam. is 0.011 x the honeycomb's rib thickness) after drying, heating and sintering/calcination. *See* Inoue at Derwent English Abstract. Inoue does not, however, teach a logarithmic standard deviation of its SiC particulate size distribution of 0.15-0.40 or 0.17-0.40, or that less than 5 wt. % of its honeycomb precursor particles possess a particulate diameter of 50% or more of the honeycomb's rib thickness. For its part, Konig teaches the production of 1-3,000 nm particle-sized non-oxide ceramic powders such as SiC wherein <1% of said powders' particles deviate more than 40% from the average particle size and no such particles deviate more than 60% therefrom, with a preferred condition wherein <1% of such particles deviate more than 10% from the average particle size and no such particles deviate more than 40% therefrom. *See* Konig at col. 2, ln. 65 to col. 3, ln. 15, col. 5, ln. 1-5. In other words, 99% of Konig's particles do not deviate from the 1-3,000 nm size range, giving "an extremely narrow particle-size distribution." *See id.* at col. 5, ln. 3-4.

In light of applicant's showing of the criticality of the claimed 0.15-0.40 logarithmic particle size standard deviation, however, *see* par. 0029-0031 of the application-as-published (US

Art Unit: 1793

2006/0154068 to Otsuka et al., published on 7/13/06), independent claims 1 and 5 have been allowed because the prior art does not teach or suggest providing a particle size standard deviation within the claimed range. Claims 2-4 have likewise been allowed because they depend from claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
